## Lock Out Device for Your Injector

The **DOSA-LOCK** is designed for small and large injector stems.

For small injector stems, your Dosa-Lock device is ready to use without modifications to the opening.

For models with larger injector stem diameters, simply cut the perforated line as illustrated below.

**NOTE:** Prior to cutting the perforated line, review the injector stem diameter chart to determine the size of your injector stem.

For larger injectors, use a utility knife to cut the clam shell opening on the perforated line.

Description	Item #
Dosa-Lock Device & Lock/Key Set	DOSA-LOCK
Replacement Lock/Key Set	DOSA-PL
Key Only	DOSA-PLKEY

\* Keys are keyed alike
